Rosa.Abrantes-  
Metz@brattle.com

Dr. Rosa M. Abrantes-Metz is a Principal at The Brattle Group based in New York City. She Co-Chairs Brattle's Global Antitrust & Competition Practice, and previously co-Chaired the Technology Practice. She has over two decades of experience specializing in antitrust, securities, and financial regulation, including work in consulting and banking, as well as in government. Her main areas of specialization are econometrics and statistics, industrial organization, and monetary and financial economics. Dr. Abrantes-Metz has a particular expertise involving the intersection between alleged market manipulations and competition issues, including alleged coordinated conduct.

Dr. Abrantes Metz is a former adjunct associate professor at Leonard N. Stern School of Business, New York University, where she taught money and banking, financial institutions and the financial crisis, industrial economics, and econometrics for MBA's. She is a former Lecturer for honors econometrics at the department of economics at the University of Chicago, and various other fields of economics at Universidade Católica Portuguesa, in Lisbon, Portugal. Dr. Abrantes-Metz's work is regularly featured in the media such as *The Wall Street Journal*, *Financial Times*, *The Economist*, *CNNMoney*, *CNBC*, *Forbes*, *Bloomberg*, *Fox Business*, *BusinessWeek*, *Washington Post*, *Huffington Post*, *Reuters*, *Crain's*, *Risk Magazine*, *Investor's Business Daily*, *L'Agefi Hebdo*, *Les Temps*, *Le Monde*, *Bloomberg TV*, *Sky News TV*, *BNN-Bloomberg TV*, *BBC Radio*, and *BBC TV*. She also contributes with Opinion Articles to several of these outlets. In 2019 she was recognized among "40 in their 40's" Notable Women Competition Professionals in the Americas, for which thirty six distinguished lawyers and four distinguished economists were selected among North, Central and South American professional women.

After working for several years as a staff economist at the Federal Trade Commission, Dr. Abrantes-Metz continued to serve as a consultant for special projects with the Commission's Bureau of Economics. She is also a senior competition policy advisor for the World Bank. Dr. Abrantes-Metz is the author of several articles on econometric methods and screens for conspiracies, manipulations and fraud, multi-sided platforms, gasoline, pharmaceuticals and health care, telecommunications, event studies and valuation, structured finance, payments systems, credit default swaps, credit ratings agencies and regulation, financial benchmarks reform, new statistical tests, and diversity in assets management. These represent some of the areas in which she also works as an economic consultant. Dr. Abrantes-Metz has published in peer-reviewed journals such as the *International Journal of Industrial Organization*, the *Journal of Pharmaceutical Finance*,

*Economics and Policy, Applied Economics Letters, the Journal of International Arbitration, the Journal of Banking and Finance, Harvard Business Law Review, University of Pennsylvania Journal of Business Law, with forthcoming publications in the Journal of Futures Markets and the Journal of International Money and Finance. Her work has also appeared in trade publications including the ABA Economics Committee Newsletter, The Antitrust Source, The Antitrust Magazine, The Antitrust Counselor, The Competition Policy International Journal and Antitrust Chronicle, Derivatives Litigation Reporter, and Securities Litigation Report.*

Dr. Abrantes-Metz is a co-drafter of the chapter on the role of the economic expert in addressing conspiracy allegations under federal antitrust laws in a recent volume published by the American Bar Association. In addition, she has contributed to other books on international arbitration with a focus on event studies, and is a co-author of the chapter on antitrust corporate governance and compliance in the Oxford Handbook of International Antitrust Economics. She has addressed the economics of alleged cartels and information exchanges from all perspectives, and is the author of the 2013 guidelines on exchanges of information among competitors for the Latin America Regional Center for Competition.

Dr. Abrantes-Metz has developed numerous empirical screens for assessing potential conspiracies, manipulations, fraud, and price gauging, and is a pioneer in the field, contributing to the further development and increased adoption of these methods worldwide. These methods are used by both plaintiffs and defendants in assessing antitrust risk. Her work covers both liability and damages, in the interception between market manipulation and cartel activity. In 2008, she flagged the possibility of collusion in LIBOR prior to the launch of large scale investigations. She has also flagged the possibility of manipulation and collusion in gold markets as well as in other markets, and more recently the possibility of bid rigging in US Treasuries auctions, among others. She has developed and applied screens not only to assist governmental agencies and plaintiffs, but also on the defense side when companies and individuals are faced with allegations of this type of conduct.

Dr. Abrantes-Metz has extended her experience in LIBOR to the analyses of other financial benchmarks and potential illegal behavior worldwide, including in assessing alleged manipulations of spot markets. She is regularly retained to address issues of price artificiality and price impact between price indices and prices in related markets as well as various types of contracts. Some of these included analyses of transportation of commodities as an alleged accessory or vehicle to market manipulation. Her experience in alleged rigging also extends to a variety of financial and commodities markets on alleged spoofing and high frequency trading, for oil and gasoline, natural gas, electricity, silver, gold, platinum, palladium, aluminum, zinc, copper and other metals including scrap metals, as well as stock prices, futures prices and NYMEX settlement prices, various swaps and options, credit default swaps, foreign exchange markets, ISDAfix, US Treasuries, sovereign and supranational bonds,

agency municipal bonds, variable rate demand obligations, mortgages, cryptocurrencies, payments systems, mortgage backed-securities, catering, lithium-ion batteries, airlines and other transportation and travel, professional sports, insurance, pharmaceuticals, mortgage foreclosure and evictions, defaults, among others. In addition to her work in this area, Dr. Abrantes-Metz has been asked by regulatory bodies to participate in roundtables on how to reform financial benchmarks worldwide, and has formally advised American and European authorities on this topic. She has also advised public and private institutions on the development and implementation of new financial benchmarks. Dr. Abrantes-Metz has advised competition and other regulatory and securities agencies around the world on the use of empirical screens to detect the possibility of market rigging and fraud in general, on the use of pricing algorithms, and has formally been engaged as an economic expert in related matters by several of these governmental agencies.

In pharmaceuticals, she co-developed a model to estimate the likelihood of drugs failing and succeeding each of the clinical stages of the Food and Drug Administration, and their expected durations in each of these phases. This model has become one of the most used by industry analysts to assist in valuing pharmaceutical and biotechnology pipelines. More recently, she studied the possibility of collusion in pharmaceutical markets. Her research on pharmaceuticals and on rigging of markets has been discussed in books on how to value pharmaceutical and biotechnology companies, and on publications pertaining to health care, intellectual property and cartels. Dr. Abrantes-Metz has undertaken pro bono consulting work assisting counsel on behalf of children with special needs, when estimating damages and settlement amounts in various matters in the state of New York.

Dr. Abrantes-Metz has provided testimony on damages, liability, class certification and plans of allocation for classes, related to alleged bid-rigging, price-fixing and market allocation in various markets, information exchanges, monopolization in generic pharmaceutical markets, pharmaceutical mergers involving horizontal and vertical restraints, market definition and collusion involving multi-sided platforms and payments systems, the valuation of an energy services provider company, the valuation of expropriated oil services assets, the valuation of stock options and various types of swaps, the valuation of utilities, and breach of contracts due to changes in financial and commodity benchmarks. Recently she provided written and oral testimony as the economic expert for the U.S. Government – The U.S. Federal Energy Regulatory Commission – on BP’s manipulation of natural gas markets, leading to a conviction. Dr. Abrantes-Metz has testified on behalf of Fannie Mae through the Department of Justice on an alleged fraud matter in the market for mortgages foreclosures and evictions, and has also been engaged by the U.S. Federal Trade Commission as an expert witness in matter involving multisided platforms. In addition, she consults with various other competition authorities around the world. Dr. Abrantes-Metz’s work has been cited in decisions by U.S. Federal Courts and by other Courts and Administrative Proceedings. She has testified before such courts, as well as in international arbitration and contractual disputes settings, in Europe, Brazil, Canada and the United States. She has also been a

signatory to Amicus Briefs submitted to the U.S. Supreme Court. Dr. Abrantes-Metz has provided testimony both in English and in Portuguese.

Rosa Abrantes-Metz holds a Ph.D. and a Masters in Economics from the University of Chicago. She also holds a Masters in Economics from the Universitat Pompeu Fabra in Barcelona, Spain, and a *Licenciatura* in Economics from Universidade Católica Portuguesa. She is a member of the *Who's Who* of Competition Lawyers & Economists since 2009.

## PROFESSIONAL EXPERIENCE

- 2020–Present    **The Brattle Group**  
*Principal*
- 2011–2020      **Global Economics Group & Market Platform Dynamics**  
*Managing Director & Principal*
- 2007–2011      **LECG**  
*Principal*
- 2004–2007      **NERA Economic Consulting**  
*Senior Consultant, Consultant*
- 2002–2004      **Federal Trade Commission, Bureau of Economics**  
*Economist*
- 2001              **RCF Economic and Financial Consulting, Inc.**  
*Part-time Consultant (June–October)*
- 2001              **Board of Governors of the Federal Reserve System**  
*Spring Associate (February–June)*
- 1998              **Banco Bozano Simonsen - Rio de Janeiro, Brazil**  
*Summer Associate (June–October)*

## Teaching & Research Positions

- 2009–2020      **New York University, Leonard N. Stern School of Business**  
*Adjunct Associate Professor – Department of Economics*  
*Visiting Scholar*
- 1998–2001      **University of Chicago, Department of Economics**  
*Lecturer for Honors Econometrics*

*Teaching Assistant for Graduate Econometrics and Macroeconomics*

**1992–1995**      **Universidade Católica Portuguesa, Lisbon, Portugal**  
*Research Assistant*  
*Instructor and Teaching Assistant, Lecturer*

## **OTHER ACADEMIC AND AGENCY AFFILIATIONS**

**2011–Present**    **World Bank**  
*Senior Competition Policy Expert*  
*Consultant for Special Projects*

**2004–2008**      **Federal Trade Commission, Bureau of Economics**  
*Consultant for Special Projects*

**2007–2009**      **Suffolk University, Sawyer Business School**  
*Board of Advisors – Department of Accounting*

## **EDUCATION**

**University of Chicago**

PhD in Economics

MA in Economics

**Universitat Pompeu Fabra, Barcelona, Spain**

MA in Economics (with High Honors)

**Universidade Nova de Lisboa, Lisbon, Portugal**

Completed First Year Ph.D. Program Course Work in Economics

**Universidade Católica Portuguesa, Lisbon, Portugal**

*Licenciatura* in Economics (Magna Cum Laude)

Second highest average among all graduating students

## **REPRESENTATIVE MATTERS**

### **Multisided Platforms, Antitrust and Regulation**

- **Causation and Damages Involving Multisided Platforms.** Conducted analyses and testimony related monopolization, collusion, market definition, predatory pricing, damages, causation and liability, in industries such as financial and derivatives markets, payments systems, travel services and transportation, and health care markets.

- **The Economics and Regulation of the Portuguese Retail Payments System.** Co-authored report analyzing how the Portuguese payment system operates and how regulatory interventions, especially those involving controls, would likely affect the interest of the various stakeholders in the system including consumers, merchants, banks, schemes, and infrastructure providers.
- **Alleged Conspiracy in Multi-Sided Platforms Markets.** Provided expert testimony on market definition and collusion on an alleged cartel by major financial institutions in a market involving multi-sided platforms.

### **Conspiracies, Monopolization, Oil & Gasoline, Pharmaceuticals and Health Care, and Other Antitrust Matters**

- **Amicus Brief.** Brief of Amici Curiae Economists in Support of Petitioners, National Collegiate Athletic Association v. Shawne Alston, U.S. Supreme Court, 2020.
- **Amicus Brief.** Brief of Amici Curiae Economists in Support of Petitioners, National Football League v. Ninth Inning, U.S. Supreme Court, 2020.
- **Alleged Conspiracy in Catering.** Provided expert testimony on an alleged cartel case involving price-fixing, bid-rigging and market allocation in catering. Developed numerous empirical approaches to address materiality and likelihood of such behaviors, and to address the alleged exchange of information among competitors. Estimated alleged overcharges.
- **Alleged WTI Futures Manipulation on April 20<sup>th</sup>, 2020.** Conducted numerous economic analyses to address transportation and storage capacity, algorithmic mal-function and market manipulation of the NYMEX WTI crude oil futures settlement price on April 20<sup>th</sup>, 2020, which took a negative value.
- **Class Certification in Lithium Ion Batteries.** Provided testimony on class certification in the LIB market, and on the likelihood of collusion and likely market price effect.
- **Class Actions Certification and Price-Fixing.** Addressed class certification using various empirical methods to determine similarity of effects across consumers allegedly belonging to the class in a price-fixing conspiracy case.
- **Alleged Manipulation and Collusion in Oil Markets Futures.** Developed various approaches to assess the likelihood of manipulation of specific WTI and Brent futures oil prices on specific days over a period of multiple years.
- **Alleged Conspiracies and Manipulations of Oil Prices Platts Indices.** Developed empirical approaches to determine whether there was evidence of a material impact of an alleged

conspiracy and manipulation of the Platts WTI Index for oil prices. Studied trading data across all market players to address price materiality, causation, market power and possible motive. Studied other related commodities and markets. Calculated allegedly illegal profits and damages.

- **Monopolization in Generic Pharmaceuticals.** Testimony submitted to the International Trade Commission on monopolization, damages and welfare loss related to market exclusion of competitor generics.
- **Alleged Conspiracy among Business Partners.** Developed an innovative approach to detect collusion based on survey data. Studied whether the patterns of responses to a survey by business partners of a major financial institution were indicative of collusion and identified suspects, later confirmed by internal records.
- **Guidelines on Exchanges of Information among Competitors.** Authored the guidelines on best practices for exchanges of information among competitors for Central and South American countries.
- **Collusion Detection in Oil and Gasoline Markets.** Developed empirical screens to detect conspiracies in gasoline. Applied screens to the US retail and wholesale data. Contributed to the FTC's gasoline monitoring program. Work performed as an FTC economist.
- **Mergers and Acquisitions in Oil and Gasoline Markets.** Developed empirical analyses to access market behavior post mergers as an FTC economist. Developed and implemented empirical analyses to assist in merger evaluation both as an FTC economist and on behalf of the merging parties.
- **Training of Competition Authorities on Cartel Detection.** Trained Competition Authorities around the world on how to detect collusion through screening and advised on how to enhance anti-cartel antitrust policies. Training also involved the development of but-for models for prices and the estimation of overcharges.
- **International Bid-Rigging.** Developed economic and empirical analyses to flag likely ongoing bid-rigging in multiple international markets on behalf of competition authorities around the world.
- **Mergers and Acquisitions in Pharmaceuticals.** Worked on various mergers in the pharmaceutical and biotech industries and addressed potential anticompetitive effects. Work performed both as an FTC economist and as an economic consultant on behalf of merging or acquired parties.

- **Estimation of Exposed Population and Brand Name Drug Sales.** Built models to estimate exposed population to a disease of interest and relevant drug sales on behalf of an insurance company in order to assess validity of claims submitted due to adverse effects allegedly caused by the drug.
- **Analysis of Pharmaceutical Merger involving Vertical Restraints.** Expert report on vertical restraints related to an acquisition of major wholesalers by the national association of pharmacies in Europe. Report focused on tying, bundling and exchanges of information.
- **Brand Name vs. Generic Pharmaceutical Drugs.** Estimated the effect of generic entry on price, volume and market shares of branded drugs in specific therapeutic areas. Used findings to estimate the but-for scenario absent generic entry. Estimated alleged damages.
- **Material Adverse Change in Connection with Acquisitions.** Determined the materiality of a disclosure on the existence of a price-fixing conspiracy sometime in the past in the aspartame market, prior to the relevant acquisition, and which could have affected the later decision to acquire the company.
- **Merger in the Poultry Industry in Brazil.** Co-authored and submitted an expert report on the estimation of the elasticities of demand across products in the same relevant market in a consummated acquisition in the Brazilian poultry industry. Estimated efficiency gains and price changes due to the acquisition.
- **Mergers and Acquisitions in the Waste Management Industry in Portugal.** Report on likely pro and anticompetitive effects of a specific acquisition raising both horizontal and vertical concerns.
- **Daily Gasoline Pricing Forecast.** Developed an econometric model for a major oil company to predict daily gasoline prices for all its competitors at the terminal level, and across all its terminals in the United States. The model significantly improved analysts' forecasts and assisted daily pricing decisions.
- **Trends and Cycles in Gasoline Prices.** Decomposed movements in gasoline prices between long-run and short-run components, across 365 cities in the United States, in order to study interconnections across various regional markets. Work performed as an FTC economist.
- **Spectral Test for Mergers and Acquisitions.** Developed a new statistical test in the frequency domain and applied it to antitrust market definition in gasoline markets. This test was later used for other applications including in financial markets. Work performed as an FTC economist.

- **Prediction of Hart-Scott-Rodino Filings.** Developed econometric models to predict HSR filings as a function of major economic indicators. Work performed as an FTC economist.
- **Estimation of the Likelihood of Success and Duration of Drugs in Clinical Stages.** Co-developed a duration model to estimate the likelihood of success and failure of drugs in each of the clinical stages of the Food and Drug Administration, as a function of various drugs characteristics. The model also estimates the expected duration for each of the drugs based on the same characteristics. Model informs mergers and acquisitions, intellectual property and valuation. Used as supporting evidence in FTC decisions such as in the Genzyme Corporation / Novazyme Pharmaceuticals, Inc., 2003 merger. Work performed as an FTC economist and as an economic consultant.
- **Mergers and Acquisitions in Other Areas.** Worked on mergers and acquisitions in various other industries such as sporting goods, cable television, boats, railroads, appliances, supermarkets, and real estate.
- **Collusion in Health Care Markets.** Worked on screening health care markets to flag possible collusion among various health care providers.
- **Health Care Costs and Innovation.** Developed a new econometric approach to estimate the contribution of technological progress to the increase in health care expenditures in the United States over the last four decades.
- **Benefits of Health Care Spending.** Developed simple econometric models to assist in determining if countries spending more on health care also experience greater health benefits from such spending.

#### **Securities, Valuation, Risk Assessment, Financial Regulation, Other Conspiracies and Antitrust involving Financial Markets, and Manipulations and Fraud in Financial and Commodities Markets**

- **USD LIBOR Conspiracy and Manipulation.** Research assisted in the launching of investigations around the world. Subsequently analyzed liability and estimated damages for various securities benchmarked against USD LIBOR on behalf of large institutional investors and governmental agencies in the United States and abroad.
- **Natural Gas Manipulation by BP.** Testimony on behalf of the Federal Energy Regulatory Commission. Developed various empirical approaches to assist in addressing intent, causation, and artificiality, consistent with BP's manipulation in natural gas markets in 2008. BP was found guilty of such conduct.
- **Fraud in Services Provided on Mortgages Foreclosures and Evictions.** Testimony on behalf of Fannie Mae and the U.S. Department of Justice. Developed various empirical

approaches to address liability and damages due to alleged overpricing of service providers in the market for mortgage foreclosures and evictions for a decade.

- **Manipulation of Cryptocurrencies.** Analyses of alleged collusion, manipulation and fraud potentially involving various cryptocurrencies.
- **Reform of LIBOR and Other Financial Benchmarks.** Advised regulatory agencies around the world on methodology, governance, regulation, transition and implementation of reforms of key financial benchmarks worldwide.
- **Design and Implementation of New Financial Benchmarks.** Advised private companies interested in developing and implementing new financial benchmarks.
- **Manipulations and Conspiracies of other (besides USD LIBOR) Financial Benchmarks including Euribor, Yen LIBOR, TIBOR, ISDAfix, Foreign Exchange WM/Reuters Fixing and FX Futures, Platts Brent and WTI Oil Benchmarks, and the LBMA Gold, Silver, Platinum and Palladium Fixings, and bond markets including US Treasuries, SSA Bonds, Agencies Bonds, Variable Rate Demand Obligations, VIX, among others.** Worked on manipulations and conspiracies of most major financial benchmarks, auction settings, bond issuance, and secondary markets for various bond types currently under investigation around the world.
- **Manipulations and Conspiracies in Precious and Non-Precious Metals Benchmarks, various Energy Products.** Worked on manipulations and conspiracies in various metals markets involving the setting of financial benchmarks in Gold, Silver, Platinum, Palladium, Aluminum, Zinc, Copper, and London Metal Exchange warehousing disruptions on Aluminum, Zinc, Copper, among others. Developed empirical approaches to assist in addressing causation, artificiality, intent, and likelihood of collusion and damages.
- **Collusion and Manipulation of U.S. Treasuries Auctions.** Developed empirical and economic analyses to detect possible bid rigging in U.S. Treasuries auctions and its effect on the secondary, when issued and futures markets.
- **Collusion, Manipulation and Fraud in Specific Bond Markets.** Developed empirical and other economic analyses to detect possible rigging in bonds markets around the world as the expert economist for competition authorities.
- **Collusion and Manipulation in Sovereign, Supranational, and Agency Bond Markets.** Developed empirical and economic analyses to detect collusion and manipulation in SSA markets, and estimated damages.

- **Collusion and Manipulation involving Spoofing in Spot and Futures Markets for Various Commodities.** Developed empirical analyses to assist in the detection and identification of spoofing in commodities markets and estimate damages.
- **Analyses and Testimony of Liability and Damages Assessment in Alleged Breach of Contract Due to Change in Commodities Benchmark for Scrap Metal.** Developed empirical and economic analyses to address a impact on transactions due to a change in scrap metal index underlying contracts. Testified on behalf of defendant in arbitration.
- **Collusion and Manipulation of Variable Rate Demand Obligations (VRDOs).** Developed analyses of artificiality of rates resetting and alleged collusive and manipulative conduct by large Remarketing Agents.
- **Collusion and Manipulation of Volatility Indices (VIX).** Developed empirical analyses consistent with collusion, manipulation and artificiality in the VIX Settlement Procedure.
- **Manipulations of Stock Prices.** Developed empirical approaches to determine whether an alleged revenue management episode in the computer industry materially affected the stock price of the company.
- **Alleged Manipulations of Hedge Funds Accounts.** Developed empirical approaches to estimate the likelihood that the observed patterns in trading and in profits by a specific trader were the result of a manipulation to maximize profits of specific accounts to the detriment of others.
- **Alleged Conspiracy between Brokers and Dealers of Major Financial Institutions.** Estimated but-for transaction prices in an alleged conspiracy between brokers and dealers of a major financial institution. Evaluated execution quality when compared to unsuspected benchmarks. Estimated allegedly illegal profits and consumers' disadvantage. Developed analyses of liability.
- **Commodities Futures Contracts Alleged Manipulations.** Developed empirical approaches to determine whether commodities futures prices of various precious metals were manipulated. Defined relevant markets, estimated price artificiality, addressed causation and market power. Studied floor and electronic trading, and where price discovery took place. Linked analyses to cash markets and related commodities. Estimated but-for trading, allegedly illegal profits, and potential damages.
- **Profitability Analyses of Special Purpose Vehicles.** Developed empirical analysis to estimate the profitability of various Special Purpose Vehicles after extracting the effects of taxes and other benefits, in comparison with foreign investments.

- **Alleged Fraud Related to Delivery Delay of Shorted Securities.** Conducted empirical analyses to assist in determining whether defendant's conduct was consistent with SEC's allegations of purported delay in delivering shorted securities to profit from illicit additional interest earned.
- **Credit Ratings and Risk.** Analyzed the evolution of structured finance ratings during the eruption of the recent financial crisis in the United States. Timed these changes with various measures of increased risk in the market and disclosures of exposures to this risk by major financial institutions.
- **Valuation of Structured Finance Securities During the 2007-2009 Financial Crisis.** Analyzed econometric models and assumptions used to value structured finance securities, namely RMBS and CDOs, during the eruption of the financial crisis. Evaluated models' sensitivities to stress scenarios and calibrations. Developed models for RMBS expected cumulative losses based on corporate default models, and tested model implications on mortgages correlations, crossed-pool correlations, and volatility of house price growth and of cumulative losses against actual and forecasted data.
- **Risk Assessment in the Financial Crisis.** Developed and implemented a sophisticated Markov Regime Switching Model to identify the evolution of risk in ABX indices from 2007 through 2009, which allowed for five different states of variable intensity and volatility. Applied various measures of relative risk in the literature to the financial crisis to assist in determine how early was subprime risk identifiable by the market.
- **Analysis of Disclosures during the Subprime Mortgages Crisis.** Matched companies' disclosures of information related to the exposure of particular assets to the evolution of risk in the market place to assist in determining whether public disclosures were timely made.
- **Valuation of Expropriated Assets in the Oil Industry.** Provided testimony on an international arbitration matter on the value of expropriated assets belonging to a publicly traded oil services company with headquarters in Texas, whose assets were expropriated by Venezuela.
- **Valuation of Utilities Assets.** Provided expert testimony on the valuation of a utilities company, containing a fairness opinion and addressing robustness and appropriateness of various valuation methods employed during a merger and acquisition process. Addressed issues related to material adverse change with respect to the acquisition.
- **Valuation in the Pharmaceutical and Biotechnology Industries.** Opined on the price offered by a major pharmaceutical company in the acquisition of a leading biotechnology

company. Used discounted cash flow models, multiple models and event studies. Assisted in the estimation of the value of the biotechnology R&D pipeline.

- **Stock and Indices Options Valuation.** Opined on the valuation of stock and indices options by a financial institution in Europe.
- **Section 10b-5 Securities Litigation.** Used event studies to estimate the effect of alleged fraud on companies' stock prices and the economic value of the effect. Estimated alleged damages.
- **Insider Trading.** Analyzed the materiality of the gain allegedly obtained through insider trading. Evaluated stock and bond prices reactions to the allegedly private and illegally obtained information. Determined the extent to which such information had previously been known and assimilated by the market.
- **Testing for Market Efficiency.** Implemented a variety of statistical tests for market efficiency of particular securities during the financial crisis and compared results with those prior to the crisis. Assessed and explained changes and the appropriateness of the assumption of market efficiency.
- **Analysis of Credit Default Swaps.** Analyzed the information content of credit default swaps and to assist in determining the material impact of having only quote data available rather than final transaction prices for market participants in general.
- **Stock Options Backdating and Spring Loading.** Developed various empirical screens to determine whether patterns observed in stock price excess returns related to alleged stock options backdating and spring loading were statistically anomalous. Studied the materiality of these events.
- **Trading in Major Stock Exchanges.** Assisted in determined whether brokers and dealers in a major stock exchange illegally profited from not crossing buying and selling orders. Estimated allegedly illegal profits and consumers' disadvantage.
- **Materiality of Disclosures Related to Conspiracies.** Investigated whether the disclosure of an alleged conspiracy between members of the same industry materially affected stock prices of the companies in the same industry and the transaction price of a merger.
- **Material Adverse Change in Connection with Merger Agreements.** Determined materiality of the stock price response to information not disclosed prior to an acquisition, information which may have affected the acquisition decision itself had it previously been known.

## Other

- **Diversity of Asset Managers.** Co-authored a study to assess the representation of women and racial or ethnic minorities among asset managers used by the top 50 charitable endowments in the United States.
- **Drug Recalls.** Estimated damages associated with the recall of major blockbuster drugs.
- **Asbestos.** Estimated damages associated with construction workers' exposure to asbestos.
- **Macroeconomic Effects of Airport Expansion.** Assisted in the estimation of the macroeconomic and sectorial specific impacts of the expansion of the Lisbon airport into the Portuguese economy.
- **Postal Services Modeling.** Developed a new econometric model to predict demand for the United States Postal Service. Model results assisted management on decisions related to pricing and product innovations.
- **Patent infringement in Medical Devices.** Estimated lost profits due to alleged patent infringement in the medical device industry.
- **Patent infringement in Pharmaceuticals.** Estimated lost profits due to alleged patent infringement in the pharmaceutical industry.
